

## ABSTRACT

2 A medical port for an emergency safety resuscitator having a collapsible bag with an  
3 outlet. An adapter has a first end available for attachment to, and communication with, the outlet  
4 of the collapsible bag. A second end of the adapter attaches to a first aperture of a tube having  
5 three apertures. The second aperture of the tube is releasably covered by a self-sealing  
6 membrane. And the third aperture of the tube is available for connection either to a mask or an  
7 endotracheal tube.
